## Work Experience

**Audit & Assurance Intern, Deloitte** Sept 2026 – Dec 2026 (Expected)

- Beginning an Audit & Assurance internship at Deloitte, supporting **financial statement audits, internal controls testing, and compliance reviews** for clients across diverse industries.

**Software Engineering Intern, Ovintiv** May 2026 – Aug 2026

- Engineered an **R/Shiny forecasting platform** integrating regression models, material pricing, and planning assumptions for **400+ Permian oil wells**, replacing a manual Excel process and saving **24-33 hours per month**.
- Designed a **scalable data architecture** in **Oracle Databases** for scenario-aware forecasting, automated reporting, and audit-ready calculation traceability, generating an estimated **\$75K in productivity gains over the next 24 months**.

**Software Development Intern, Ovintiv** May 2025 – Dec 2025

- Developed and deployed an Emergency Response Plan app in **ReactJS, Python, and Flask** via **Azure DevOps** and **CI/CD pipelines**, cutting incident reporting time **by 35%** and boosting response efficiency for **100+ field employees**.
- Automated security access provisioning by combining **ServiceNow** with **Python** scripts hosted on **Azure App Services**, protected via **Azure Key Vault**, and connected to **Oracle databases**, reducing access provisioning time **by 40%**.

## Leadership Experience

**Vice President, Internal, Data Science and Machine Learning Club (DSMLC)** Nov 2023 – Present

- Oversee **Events, Operations, and Marketing**, coordinating **15 to 20 annual events and 6 annual workshops** while also managing the development of a centralized data hub to track and analyze the club's online presence.
- Built partnerships with **30+ professionals**, obtaining **\$10,500 in sponsorships** and resulting in the club's largest event to date with **150+ attendees and 20+ company participants**.

**Co-Founder and Co-President, Mechatronics Integration of Neural Dynamics (MIND)** Feb 2024 – Feb 2026

- Launched the club's financial and outreach systems, **securing \$8600 in funding** and recruiting **20+ R&D members** from **140+ applicants** across engineering disciplines, establishing MIND's foundational team and BCI development pipeline.
- Led a team of **10+ interdisciplinary students** to develop a BCI-controlled RC car using brain signals, applying **frequency filters, Independent Component Analysis, and threshold classification** in **Python**.

## Projects

**QuantArc - Personalized Financial Analytics** Azure | FastAPI | ReactJS | Plaid API

- Built a Windows personal finance desktop app using **Model View Provider (MVP) architecture, Electron, Python, and Azure SQL**, incorporating **6+ APIs** for personalized portfolio tracking, market research, and live news sentiment.
- Architected authenticated financial data flows using **Plaid, JWT, AES GCM encryption, provider adapters, async caching, and rate limiting**, improving reliability through backup-based portfolio recovery and multi provider market data.

**MINDStream - Electroencephalogram (EEG) Dashboard** Python | Signal Analysis | PyQT

- Designing a real-time EEG dashboard with **PyQT, BrainFlow, Matplotlib, and VisPy**, enabling EEG board integration, band filtering, and live signal visualizations, creating an end user friendly interface for **25+ researchers and students**.
- Implementing GPU accelerated graphics, multithreaded data collection, trial timers, and signal processing, increasing **experiment efficiency by 2×** and **boosting signal clarity by 3×** through optimized gain, sampling, and noise filtering.

## Education

**Haskayne School of Business, University of Calgary – Calgary, Canada** Sept 2023 – Apr 2028 (Expected)

Bachelor of Computer Science & Bachelor of Commerce (Finance) **GPA: 3.94 / 4.0**

**Nanyang Technological University – Singapore, Singapore** Jan 2026 – Apr 2026

GEM Trailblazers Exchange Program, Business and Artificial Intelligence **GPA: 4.17 / 5.0**

## Skills

**Languages:** TypeScript, HTML5, CSS, Python, SQL, Java, R, ARMV8, C

**Libraries / Frameworks:** NodeJS, ReactJS, ThreeJS, Tailwind CSS, FastAPI, PyQT, VisPy, SciPy, NumPy, Pandas, Mathplotlib, PostgreSQL, OracleSQL, TSQL, JavaFX, Shiny, Tidyverse

**Technologies / Tools:** Azure, AWS, ServiceNow, Git, Oracle, DBeaver, RStudio, Excel, Power BI, Microsoft 365
