Education

University of Calgary Expected Apr 2028
Bachelor of Commerce in Finance; Bachelor of Science in Computer Science *GPA: 3.94/4.0*
Selected Awards: Louise McKinney Scholarship; Inspiring Business Leader Scholarship

Experience

Audit and Assurance Intern Sept 2026 to Present
Deloitte *Calgary, AB*

- Supporting financial statement audit work for a private equity client, including **tests of details and substantive analytical procedures**; completed training in audit ethics, fraud detection, and regulatory requirements.

Software Engineering Intern May 2026 to Aug 2026
Ovintiv *Calgary, AB*

- Translated an Excel capital expenditure model into an R/Shiny application forecasting Project Ultimate Costs across all cost codes for 400+ Permian wells, saving **24 to 33 hours of manual work per month**.
- Integrated regression models, material pricing, and planning assumptions to compare cost scenarios; designed Oracle data structures that made **forecasting inputs and calculations traceable** for business stakeholders.
- Evaluated the solution's economic value with engineers, estimating **$75K in net productivity gains over 24 months** after accounting for salary, implementation, learning, and internship costs.

Software Development Student, Chief Digital Office May 2025 to Dec 2025
Ovintiv *Calgary, AB*

- Automated access provisioning across business applications using Python, ServiceNow, and Oracle, **reducing processing time by 80%**; strengthened risk assessment workflows through permission logic and interface improvements.

Projects

CAPM Portfolio Optimization and Forecasting | *Excel Solver* Apr 2025

- Optimized a four asset portfolio in Excel Solver to **maximize the Sharpe ratio**, comparing portfolio weights, risk, and return across **50 sample portfolios** using historical data.
- Tested CAPM forecasts across market periods, identified divergences between predicted and observed asset returns, and recommended **rolling beta estimation and portfolio reoptimization** as market conditions changed.

QuantArc | *Personal Financial Analytics* Aug 2026

- Built a desktop financial analytics application integrating **6+ APIs**, including Plaid, to consolidate bank and investment accounts, portfolio tracking, market data, news sentiment, and live currency conversion.
- Enabled **comparison of up to five securities** and secured financial account data with authentication and token encryption.

Extracurriculars

Vice President, Internal Apr 2026 to Present
Data Science and Machine Learning Club *University of Calgary*

- Raised **$10,500 in sponsorships** through relationships with 30+ professionals; oversaw development of a centralized analytics hub and coordinated a networking event for **150+ attendees and 20+ companies**.

Cofounder, Former President and Advisor Feb 2024 to Apr 2026
MIND *University of Calgary*

- Established financial and outreach systems, secured **$8,000+ in funding**, and recruited 20+ members from 140+ applicants; **personally designed MINDStream** and led a 20+ member engineering team across neurotechnology projects.
